

2003 COMP 762B Modelling and Simulation Based Design

Name of Evaluator:

Date:

Evaluation Instructions: Each student in COMP 762 is asked to complete the following evaluation for each presentation. Your evaluation will be evaluated by the course instructor.

You are asked to give your evaluation for the following areas. Please note that your evaluation, with your name removed, will be given to the presenter(s).

Visitors are also asked to contribute to this process.

Overall Presentation Quality (1-5):

Use the following scale:

- 1-terrible,
- 2-needed a lot more work,
- 3-reasonable, average
- 4-very good, above average,
- 5-truly exceptional, one of the best presentations.

Subject Knowledge of the Presenter (1-5):

Use the following scale:

- 1-minimal,
- 2-needs to study the subject/article more,
- 3-reasonable, average
- 4-very good, above average,
- 5-true, in-depth understanding of the material.

Presentation Organization (1-5):

Use the following scale:

- 1-couldn't follow much of the presentation,
- 2-got lost often,
- 3-reasonable, average,
- 4-well organized, above average,
- 5-excellent, one of the best organized presentations.

Best Point: What was the best thing about this presentation?

Worst Point: What could have been improved? Note that this need not be really negative, just something that you think could be better. Think both of content-related issues and presentation-related issues.

Summary: In your opinion, what were the important 2 or 3 points from the presentation. What did you learn ?
