Activity Diagrams

- describe behaviour
- at high level of abstraction
- focus on workflows (processes/activities)
- elegant description of *concurrency*
- can express *non-determinism*
- as of UML 2.0 based on *Petri Nets* (before: Statecharts)

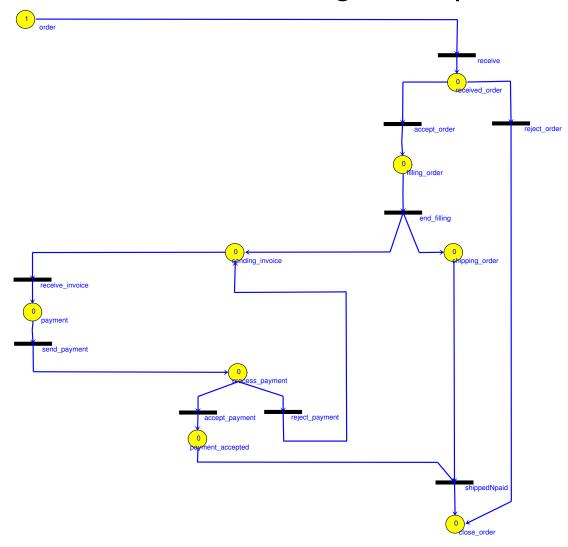

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 1/19

Petri nets

- Formalism similar to FSA
- Graphical notation
- C.A. Petri 1960s
- Additions to FSA:
 - Explicitly (graphically) represent when event is enabled
 - \rightarrow describe control logic
 - Elegant notation of concurrency, synchronization
 - Express non-determinism

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 2/19

Order Processing Example

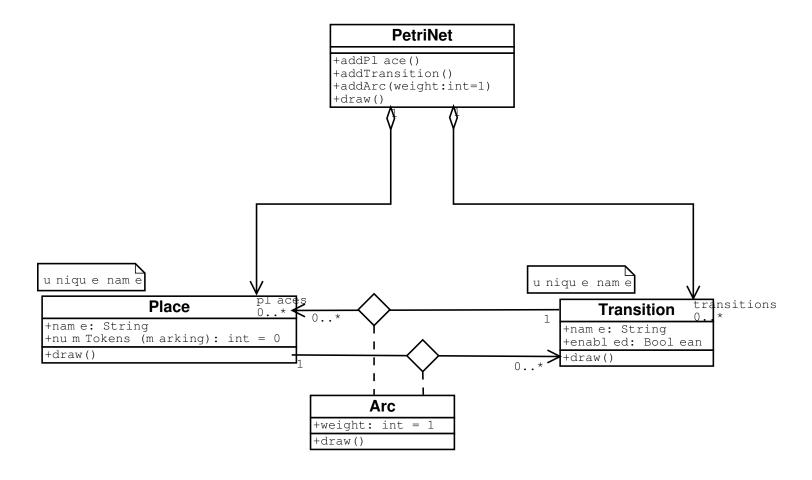

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 3/19

Petri net notation and definition (no dynamics)

- $P = \{p_1, p_2, ...\}$ is a finite set of *places*
- $T = \{t_1, t_2, ...\}$ is a finite set of *transitions*
- $A \subseteq (P \times T) \cup (T \times P)$ is a set of *arcs*
- $w: A \to \mathbb{N}$ is a weight function

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 4/19

Class Diagram model of Petri Net Abstract Syntax

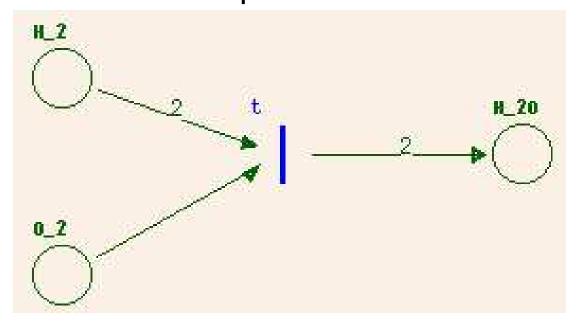

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 5/19

Derived Entities

- $I(t_j) = \{p_i : (p_i, t_j) \in A\}$ set of *input places* to transition t_j (\equiv conditions for transition)
- $O(t_j) = \{p_i : (t_j, p_i) \in A\}$ set of *output places* from transition t_j (\equiv affected by transition)
- Transitions ≡ events
- ullet similarly: input- and output-transitions for p_i
- graphical representation (concrete syntax):
 Petri net graph (multigraph)

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 6/19

Example Petri net

- $P = \{H_2, O_2, H_2O\}$
- $\bullet \ T = \{t\}$
- $A = \{(H_2, t), (O_2, t), (t, H_2O)\}$
- $w((H_2,t)) = 2, w((O_2,t)) = 1, w((t,H_2O)) = 2$

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 7/19

Introducing State: Petri net Markings

- Conditions met ? Use tokens in places
- Token assignment \equiv *marking* x

$$x: P \to \mathbb{N}$$

A marked Petri net

$$(P,T,A,w,x_0)$$

 x_0 is the *initial marking*

• The state x of a marked Petri net

$$\mathbf{x} = [x(p_1), x(p_2), \dots, x(p_n)]$$

Number of tokens need not be bounded (cfr. State Automata states).

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 8/19

State Space of Marked Petri net

• All *n*-dimensional vectors of nonnegative integer markings

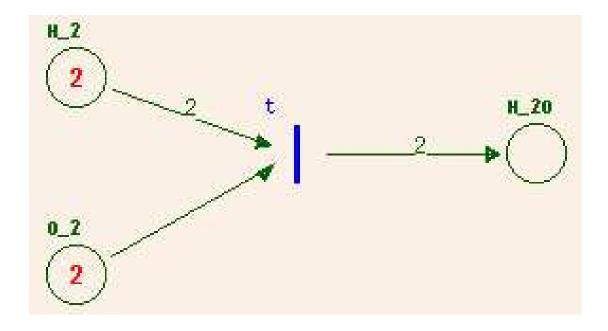

$$X = \mathbb{N}^n$$

• Transition $t_j \in T$ is *enabled* if

$$x(p_i) \ge w(p_i, t_j), \forall p_i \in I(t_j)$$

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 9/19

Example with marking, enabled

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 10/19

Petri Net Dynamics

State Transition Function f of marked Petri net (P, T, A, w, x_0)

$$f: \mathbb{N}^n \times T \to \mathbb{N}^n$$

is defined for transition $t_i \in T$ if and only if

$$x(p_i) \ge w(p_i, t_j), \forall p_i \in I(t_j)$$

If $f(\mathbf{x},t_j)$ is defined, set $\mathbf{x}'=f(\mathbf{x},t_j)$ where

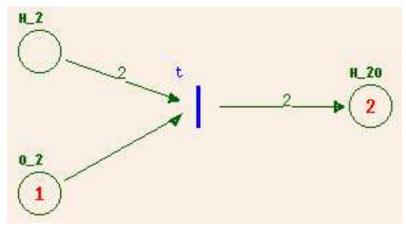

$$x'(p_i) = x(p_i) - w(p_i, t_j) + w(t_j, p_i)$$

- State transition function f based on structure of Petri net
- Number of tokens need not be conserved (but can)

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 11/19

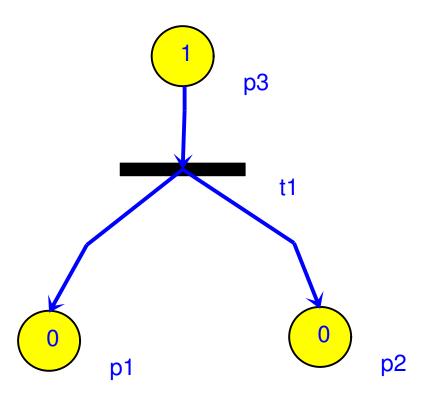

Example "firing"

- Sequential Manual execution
- Transition: $[2,2,0] \rightarrow [0,1,2]$

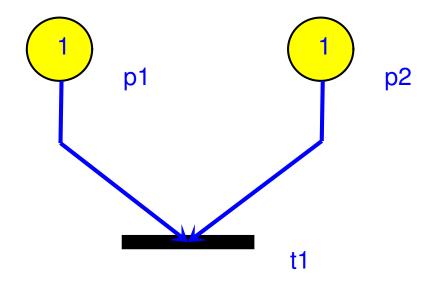

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 12/19

Fork

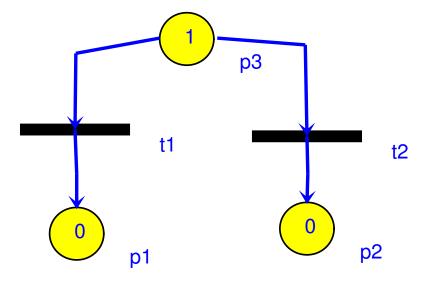

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 13/19

Join

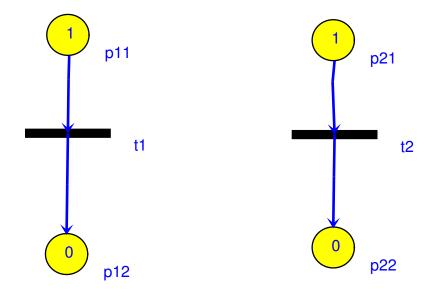

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 14/19

Conflict, choice, decision

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 15/19

Concurrency

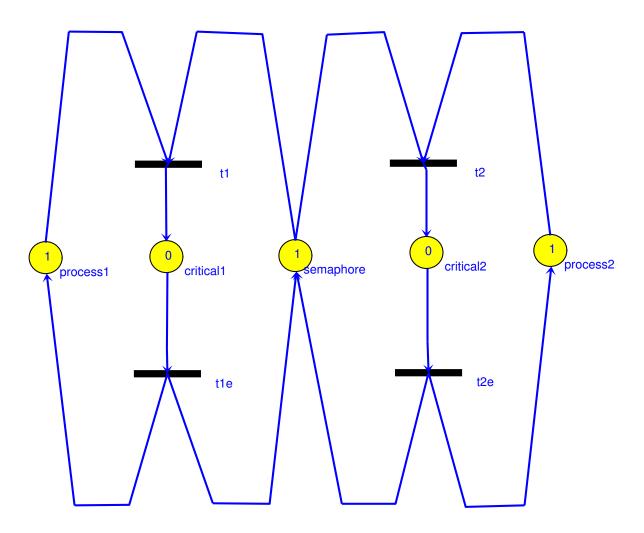

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 16/19

Semantics

- sequential vs. parallel
- Handle nondeterminism:
 - 1. User choice
 - 2. Priorities
 - 3. Probabilities (Monte Carlo)
 - 4. Reachability Graph (enumerate all choices)

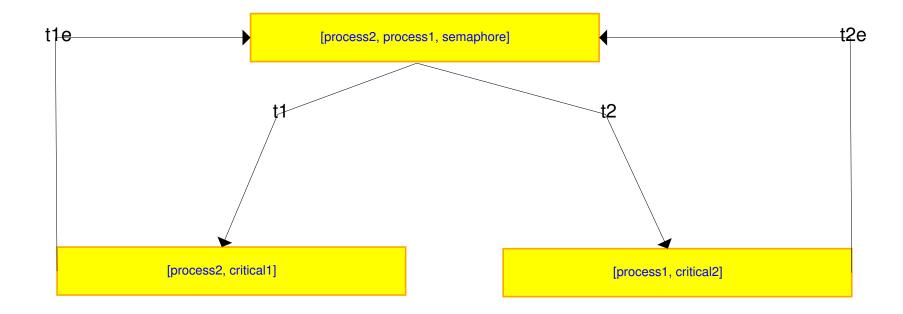

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 17/19

Application: Critical Section

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 18/19

Reachability Graph

COMP 304 hv@cs.mcgill.ca Activity Diagrams / Petri Nets 19/19
